# multiple

# THE FUTURE OF PHOTONICS-BASED PROCESS OPTIMISATION

MULTIPLE will bring together snapshot mosaic filters, organic-electronics-based sensors, and state-of-the-art machine learning to deliver breakthrough and cost-effective snapshot hyperspectral imaging and spectrometric solutions covering a broad spectral range and suited to actual industrial monitoring and control needs.

MULTIPLE multi-modal monitoring systems will be IoT native, exploiting open source cloud, big data, and deep learning technology. A fast-orchestrated deployment of data-driven AI-based models will foster production optimisation.

| Smart |
| Cost-effective |
| Process Integrated |

## Focus Markets

Steel manufacturing

Woodworking

Food industy

## Enabling Markets

Environmental monitoring · Smart farming · Packaging· Pharmaceutical · Forensics sciences
Predictive maintenance · Oil & Gas · Waste management Textile industry · Surveillance & Security

# multiple

Multimodal spectral sensors and orchestrated deep models for integrated process optimization
